Download the EB App

Download the EB2017 app to keep yourself organized with up-to-the-minute event information and build your personalized schedule.

Using feedback from attendee surveys and for environmental reasons, EB does not have a printed program book this year. Members are able to access the full program in a PDF file online and through the EB mobile app. There is free wifi throughout the meeting space.

The EB mobile app is available for download in the Apple and GooglePlay store. Search for "Experimental Biology 2017."

Surmounting the Insurmountable: Obstacles in Drug Discovery and Development - Real World Case Studies

Tuesday, April 25, 2017, 3:00 pm – 5:30 pm
 McCormick Place Convention Center, Room W475ab
 Chairs: Kan He, Biotranex, LLC and Paul F. Hollenberg, Univ of Michigan

This session could also be called The Sherlock Holmes of the Lab: Solving Problems When Things Go Wrong in Drug Discovery and Development. During the drug discovery and development process in the real world, expert scientists frequently encounter an unexpected obstacle that seems insurmountable. Suddenly, the entire program is threatened and timetables are in a tailspin. Serious issues with efficacy, toxicity, and pharmacokinetics may unexpectedly threaten the successful development of the whole project. How do experienced scientists deal with such issues? Critical thinking and problem solving are essential for success. This session features recognized experts in drug discovery and development and their fascinating and challenging stories. Scientists and managers, from experienced experts to grad students will learn the “inside story” of detailed real world case studies. What went fatally wrong with a particular drug? How was the problem solved? It’s like a Sherlock Holmes story: here’s the mystery, find out who solved it and how.

Ancillary Functions at EB2017

The following are affiliated events organized by groups other than ASPET but taking place during EB2017. Please contact the organizers for more information.

Association of Medical School Pharmacology Chairs (AMSPC) Mixer	Sunday, April 23
Behavioral Pharmacology Society (BPS) – GUEST SOCIETY	Friday-Saturday April 21-22
Catecholamine Society Dinner	Tuesday, April 25
Global GI Club – GUEST SOCIETY	Sunday, April 23
Michigan State University Pharmacology and Toxicology Mixer	Monday, April 24
PhRMA Foundation Reception	Monday, April 24
Univ. of Michigan Dept. of Pharmacology and Dept. of Biological Chemistry Social Hour	Saturday, April 22

*Before it became a medicine,
It was 5,000 researched compounds.
87 different protein structures.
500,000 lab tests.
1,600 scientists.
80-hour workweeks.
14 years of breakthroughs and setbacks.
36 clinical trials.
8,500 patient volunteers.
And more problems to solve than we could count.
Before it became a medicine,
It was an idea in the mind of a Pfizer scientist.
Now it's a medicine
That saves lives every day.*

Driven to discover the cure
